1. Particulars of the Enterprise

Name of the Enterprise	ABC Spice Bharat Pvt. Ltd	Constitution	Pvt. Ltd. Company
MSME Status	Unregistered	MSME Registration No.	
Date of Registration	14-10-2020	Date of incorporation / commencement of business	16-04-2006
ROC Number, if applicable		NA	
Registered Office		Vishwas Nagar, Delhi	
Administrative Office		Vishwas Nagar, Delhi	
Factory Address		Vishwas Nagar, Delhi	

2. Project Loan applied for

Proposal for Term loan of Rs.25Lakh

3. Project Proponent

Name of the Promoter	PratapVerma	Raj Mohan
Father's/ Husband's name		
Age (Years)	49	54
Educational Qualification		
Residential Address		
Passport No.		
Passport valid till		
Permanent Account Number		
Relationship with the chief promoter		
Experience in what capacity/industry years	24	32
Net Worth as on	-	-
Income Tax Status	Resident	Resident
Other concerns interest / in which		
Capacity/Financial Stake		
Mention, if belongs to Scheduled Castes/ Scheduled Tribes/ Minority Community)		
Mention, if Ex-serviceman		
Mention, if first generation entrepreneur	0	0
Experience in similar line of activity	0	0

Experience in any other line of activity	0	0
Functional responsibilities in the unit		
Share Holding in the unit (existing)	0.	0
Share Holding in the unit (proposed)	0	0
Any other relevant information	PratapVerma is acquired his Masters in Business Administration from Delhi University with that he has solid 24 years of experience in manufacturing and trading units. Pratap existing work helped the organization to accomplish their goal and meet the target.	He has over 32 years of experience in developing Projects, primarily in Food and Beverage sector in India.

4. Proposed Shareholding

S.No.	Name of the Directors	No of shares	Shareholding	
			Rs	%
	S/Shri			
1	PratapVerma	5000	50000.00	50.00
2	Raj Mohan	5000	50000.00	50.00

5. Proposed Management Team

S.No.	Name	Designation	Role
1	Govind Kumar	General Manager	Managing the firm
2	Manish Kumar	Product Manager	Identifies customer's needs
3	Ashok Chakrawarthy	Supervisor	Ensuring daily operation

6. Brief Description Of The Project

Spice Grinders Pvt. Ltd is incorporated on 14th October 2020. It is classified as Non-govt Firm. Firm is engaged in the business of manufacturing Red Chili Powder and other Grinding Masala's. In future, Firm is planning for trading of food products. The offered range is manufactured in line with the national quality standards using genuine components, which are sourced from the coherent vendors of the market. Based in Vishwa Nagar- Delhi, we have developed a state-of-the-art infrastructure facility for the smooth operation of business activities.

Spices play an important role in enhancing the flavor and taste of the processed foods. In addition, medicine industry is a major consumer of spices. Spice shall mean or to be applied to any dried, fragrant, aromatic or pungent, edible vegetable or plant substance, in the whole, broken or ground form, which contributes flavor; whose primary function in food is seasoning rather than nutrition, and which may contribute relish or piquancy to foods or beverages that is true to name, and from which no portion of any volatile oil or other flavoring principle has been purposely removed, or which no additive or spent spice has been added. Spices may be either the bark, buds, bulbs, flowers, fruit, leaves, rhizome, roots, seeds, stigmas and styles or the entire plant tops.

7. Details of Raw Material along with Mode of Transportation

Various spices such as Red Chilli, Turmeric , Cumin seeds, , pepper, are required as essential raw materials. To pack dried powders, packing materials of food grade is required and to pack them in bunch, cardboard boxes are required.

The major raw material shall be un-ground turmeric, black pepper and chillies. Considering 5 % process loss, the total quantity required would be 63 tonnes per year for the proposed capacity of 60 tonnes. Spices are widely grown in Meghalaya, Assam and Kerala. Total production of spices in the country is estimated to be 5387092 MT / year out of which production in West Bengal is estimated to be 211128 MT/ year. Hence, availability of raw material round the year will not be a problem. The project would require printed polythene bags of different sizes which would be available locally.

The following are the raw materials and its mode of transportation required to manufacture the varied spices:

Raw Materials	Mode of Transportation
Chilly	Truck
Coriander	Truck
Cumin Seed	Truck
Pepper	Truck

7.1 ETP Plant

ETP (Effluent Treatment Plant) is a process design for treating the industrial waste water for its reuse or safe disposal to the environment. Our ETP systems are very compact, tailor-made designs, portable required very less foot-print to accommodate, energy efficient.

Need of ETP

- To clean industry effluent and recycle it for further use.
- To reduce the usage of fresh/potable water in Industries.
- To cut expenditure on water procurement.
- To meet the Standards for emission or discharge of environmental pollutants from various Industries set by the Government and avoid hefty penalties.
- To safeguard environment against pollution and contribute in sustainable development

8. Product History

A spice is a seed, fruit, root, bark, or other plant substance primarily used for flavoring or coloring food. Spices are distinguished from herbs, which are the leaves, flowers, or stems of plants used for flavoring or as a garnish. Spices are sometimes used in medicine, religious rituals, cosmetics or perfume production. For example, vanilla is commonly used as an ingredient in fragrance manufacturing.

A spice may be available in several forms: fresh, whole dried, or pre-ground dried. Generally, spices are dried. Spices may be ground into a powder for convenience. A whole dried spice has the longest shelf life, so it can be purchased and stored in larger amounts, making it cheaper on a per-serving basis. A fresh spice, such as ginger, is usually more flavorful than its dried form, but fresh spices are more expensive and have a much shorter shelf life. Some spices are not always available either fresh or whole, for example turmeric, and often must be purchased in ground form. Small seeds, such as fennel and mustard seeds, are often used both whole and in powder form.

Spices were among the most demanded and expensive products available in Europe in the Middle Ages, the most common being black pepper, cinnamon (and the cheaper alternative cassia), cumin, nutmeg, ginger and cloves. Given medieval medicine's main theory of humorism, spices and herbs were indispensable to balance "humors" in food, a daily basis for good health at a time of recurrent pandemics. In addition to being desired by those using medieval medicine, the European elite also craved spices in the Middle Ages. An example of the European aristocracy's demand for spice comes from the King of Aragon, who invested substantial resources into bringing back spices to Spain in the 12th century. He was specifically looking for spices to put in wine, and was not alone among European monarchs at the time to have such a desire for spice.

Spices were all imported from plantations in Asia and Africa, which made them expensive. From the 8th until the 15th century, the Republic of Venice held a monopoly on spice trade with the Middle East, using this position to dominate the neighboring Italian maritime republics and city-states. The trade made the region rich. It has been estimated that around 1,000 tons of pepper and 1,000 tons of the other common spices were imported into Western Europe each year during the Late Middle Ages. The value of these goods was the equivalent of a yearly supply of grain for 1.5 million people. The most exclusive was saffron, used as much for its vivid yellow-red color as for its flavor. Spices that have now fallen into obscurity in European cuisine include grains of paradise, a relative of cardamom which mostly replaced pepper in late medieval north French cooking, long pepper, mace, spikenard, galangal and cubeb.

Classification and types

Spices Common Name	Scientific Names of Spices	Family of Spices	Classification of Spices
Ginger	Zingiberofficinale	Zingiberaceae	rhizome
Cinnamon	Cinnamomumzeylanicum	Lauraceae	bark
Cloves	Eugenia caryophyllata	Myrtaceae	dried flower buds
Saffron	Crocus sativus	Iridae	style and stigmas
Chillies	Capsicum frutescens	Solanaceae	Berry
Pepper black and white	Piper nigrum	Piperaceae	Berry
Caraway	CarumCarvi	Umbelliferae	Cremocarps
Coriander	Coriandrumsativum	Umbelliferae	Cremocarps
Fennel	Foeniculumvulgare	Umbelliferae	Cremocarps
Cardamom	Elettariacardamomum	Zingiberaceae	Seeds
Fenugreek	Trigonellafeomumgraecum	Fabaceae	Seeds
Mustard	Brassica Nigra	Cruciferae	Seeds

8.1 Uses And Application Of The Product

Spices are heavily used in Indian household for preparing food. They give aroma, taste and flavor to food. Curry powder, extensively used in Indian recipes, contains some time more than 20 different spices. Even in foreign countries, Indian spices are extensively used in preparation of food. Some of spices have medicinal properties and can be used in preparation of medicines and ayurvedic& cosmetic products. Have a quick overview of Indian spices, their uses and benefits.

Spices	Uses	Benefits
Chilli (Lal Mirch)	It is a main ingredient used for adding hot flavour to the food.	The antioxidants present in chilli help to cope with cholesterol. It also helps burning calories
Cumin (Zeera)	It is used for cooking and it also possesses medicinal properties.	It is a good source of iron and keeps immune system healthy. Water boiled with cumin seeds is good for coping with dysentery.
Coriander Seeds (Dhaniya)	It is extensively used in cooking, especially for garnishing. It has many medicinal uses too.	It helps coping with cold, cough, infections etc. It helps to deal with muscle pains and digestive problems
Turmeric (Haldi)	It is used in cooking and skin care products. It has wide range medicinal uses.	It helps deal with skin problems. Turmeric powder can be used for healing cuts and wounds. It also makes coping with diabetes easier.

10. Location of the Project

10.1 General Location Of The Site

The ABC Spice Bharat Pvt. Ltd is located at Vishwa Nagar, Delhi – 110032. The area required to start the manufacturing unit is around 150 sq. meters with power and water supply. Depending on the plant size, washing raw spices would require around 800 liters of water per day.

11. Market Survey

11.1 Present Market Position Demand Supply

Spices have been an integral part of the Indian diet, and the demand for spices has been growing year after year. India has certain natural comparative advantages with respect to production and utilization of spices; these include diverse agro-climatic production environments, availability of innumerable varieties and cultivars of each spice suitable for different climatic conditions, cheap labor, large domestic market and a strong tradition of using spices and their products in food, medicine and cosmetics.

The global demand for a variety of spices has continued to rise in the past few years owing to the vast rise in the consumption of convenience foods, snacks, and confectionary. The widened market for processed and ready-to-eat food products has also had a vast positive impact on the overall global consumption of a variety of spice.

The increasing demand for innovative flavors, authentic cuisines, and ethnic tastes in foods and snacks is augmenting the market for spices in India. Additionally, a significant growth in the food processing industry along with hectic work schedules and sedentary lifestyles of the consumers are also propelling the demand for convenient food options. As a result, the growing utilization of spices in processed and ready-to-eat food products is further driving the market growth in the country. Apart from this, the expanding HoReCa sector in India is also bolstering the market growth. Moreover, the increasing penetration of western food trends is further catalyzing the demand for a variety of newer spices. Additionally, the Indian government has introduced stringent regulations to curb the adulteration of spices, thereby inducing the production of safer product variants. Furthermore, the rising consumer concerns towards the negative health impact of synthetic additives in spices are augmenting the demand for natural and organic spices in the country.

11.2 Market Opportunity

The India spices market size reached INR 142,569.3 Crores in 2021. Looking forward, IMARC Group expects the market to reach INR 270,928.4 Crores by 2027, exhibiting a growth rate (CAGR) of 11.15% during 2022-2027.

India is the largest producer, consumer, and exporter of spices in the world. India, known as the home of spices, boasts a long history of trading with the ancient civilizations of Rome and China. Today, Indian spices are the most sought-after globally, given their exquisite aroma, texture, taste and medicinal value. India has the largest domestic market for spices in the world. Traditionally, spices in India have been grown in small land holdings, with organic farming gaining prominence in recent times.

India being a major producer of spices boosts stronger potential for spices supply. Spice exports contribute to nation's gross income considerably in countries like China, India, Africa and the Middle East. Spices are generally sold at premium prices and also in greater demand which can further enhance export revenues in major spice producing countries. Spices farming mechanism starts at grass root level conserving the generative and renewing capacity of the soil, plant nutrition, and soil management, yields nutritious food rich in vitality which has resistance to diseases. Increasing demand of natural flavoring and coloring agents in food, medicinal properties and health benefits are driving the spices market. There is high demand for spices from regions like Asia Pacific, Middle East and Europe.

An analysis of the key trends in each sub-segment of the India spices market, along with forecasts at the country and regional level from 2022-2027.

Breakup by Product Type:

12. Technical Feasibility

12.1 Land & Building

Land measuring around 95 sq. mtrs. is adequate with built –up area of about 65 sq. mtrs. Consisting of main production area, packing room and godown. The total cost is expected to be Rs.5 lakh.

12.2 Plant & Machinery

S.No.	Name	Proposed Quantity or units	Proposed Cost (Rs Lakhs)		Supplier / Manufacturer (Supported by Quotation)	Total Cost
			Basic Cost	Taxes, Freight Installation, insurance etc.		
1	Digital weighing balance with accuracy of 0.01 gm	1	0.45		XYZ and company	0.45
2	Weighing scale	2	0.25		XYZ and company	0.50
3	Masala Mixer Machine	2	0.50		XYZ and company	1.00
4	Powder filling and packaging machine	1	5.00		ABC and company	5.00

5	Lab testing equipment	1	2.00		ABC and company -	2.00
6	Automatic Spice Grinding Machine	2	2.10		ABC and company	4.20
7	Washing and Cleaning Machine	1	3.00		PS Enterprises	3.00
8	Tray Dryer	2	3.00		PS Enterprises	6.00
	Total Cost					22.15

12.3 Miscellaneous Fixed Assets

S.No	Description	Quantity	Supplier	Unit cost in Rupees	Total Cost (Rs)
1	Miscellaneous Equipment	1	ABC and company	100000	1.00
2	Electrical Fittings	12	ABC Company	50000	6.00
	Total Cost				7.00

12.4 Manpower Requirement

The enterprise requires 17 employees as detailed below:

	No.	Per Month (Rs)	Amount (Rs)
Accountant cum cashier	1	18900	18900
Manager	1	22000	22000
Mechanic	2	11000	11000
Helpers	3	10000	10000
Labour	8	10000	10000
Security	2	9000	9000
		Total	190900

12.5 Power

In that location proper availability of power by BSES Rajdhani power limited. In case of any kind of power cut company have their own generator to produce enough power . There is proper supply of water by Delhi Jal Board for drinking uses.

Total Power Load	Load Factor	Total units consumption per annum	Ratio of power to be obtained from SEB.	Own generation Power Load	Own generation Power	Total Electricity Cost
------------------	-------------	-----------------------------------	---	---------------------------	----------------------	------------------------

						(Rs lakh)
60	1	144000	80%	20%	28800	13.82

13. Technology & Process Description

13.1 Manufacturing Process of Spices

This manufacturing unit involves cleaning, drying, pulverizing, sieving, and packing spices like chilli, turmeric, coriander, etc. either individually or in combination with other spices. The manufacturing process is very well established and does not involve technicalities.

Step 1: Cleaning - It is the very first spice making method in which the ungrounded spices are manually washed by removing impurities such as stone, dust, and dirt.

Step 2: Drying - The consistency of the spice powder will rely on the well-dried spice just after the cleaning and washing process, showing them in sunlight so that they can dry. If there is no good cleaning and washing, it will result in the growth of bacteria that will poison food.

Step 3: Roasting - When spices are dried, they go through the roasting process as the roasting of the spices is important because it will help give the spice powder the scent, color, and good taste.

Step 4: Grinding - For pulverizing, grinding machines are used to turn the spices into powder form.

Step 5: Grading - Grading is a process that depends on the form of spices (flavor), density, shape, size, and color, and is the basis for the inclusion and proportion of spices combined with the raw material used.

Step 6: Sieving - The storage and proper distribution are important in getting long-term success

In the spice business. Perfect care is needed during packaging depending on the types of spices and humidity.

Step 7: Packing -Spice and spice powders are weighed as per the contemplated packing quantities and packed in printed polythene bags and then these bags are sealed on an automatic sealing machine.

14. Commercial Viability

14.1 SWOT Analysis

STRENGTH

- Spices are an essential item used on a massive scale not only in India but worldwide. This suggests that this will not go to an end. Henceforth, investing in the spice business will be a strategic move. Also, people in today's time mostly use ready-made masalas which gives scope for every other person to start investing in the business.

WEAKNESS

- It's not ready to eat the product, hence it involves several steps to reach the final end-user that makes it a bit costly. Also, as mentioned above working labor issue is the main weakness of this business, which a new investor has to overcome.

OPPORTUNITY

- Here are so many opportunities lies for a new investor, after brand marketing there will be nothing but high returns. Not only can you tie-up with local vendors but big brand marts such as Reliance, Grofers, Easy Day, where your brand will get more

recognition.

THREATS

- Major threats are allegations of adulteration for name shame. However other one is of a number of competitors in the market where you have to win the stake by making your marketing strategy unique and by giving the best quality.

14.2 Subsidy

A Central subsidy may be available to the tune of 35% on cost of Plant and machinery as per policies of different state subsidies. This may work out to Rs.10.00 lakhs (35% of plant and machinery)

15. Proposed Schedule for Approval & Implementation

Particulars	Date of Commencement
Acquisition Of Premises	20-12-2022
Development Of Land	20-01-2023
Plant And Machinery	
Civil works for	
- Factory Building	31-01-2023
